PROFILE

Flutter Developer with strong knowledge of Dart, Flutter architecture, and state management. Skilled in building responsive UI, API integration, and deploying scalable mobile applications for Android and iOS. Passionate about writing clean, maintainable code and continuously improving app performance. Eager to learn, build real-world apps, and contribute to production-level projects.

SKILLS

- **Mobile Development:** Flutter, Dart, Android Studio
 - **State Management:** Provider, Bloc, GetX, Riverpod
 - **Backend & APIs:** REST APIs, Firebase, Dio, Dependency Injection
 - **Databases:** SQLite, Hive
 - **Version Control:** Git
 - **UI/UX:** Responsive Design, MVVM Architecture
-

EXPERIENCE

Flutter Developer Intern – Habbiton Labs Pvt Ltd, Trivandrum | 2026

- Collaborated with senior developers to build and test mobile applications.
 - Implemented responsive UI components and integrated REST APIs.
 - Gained hands-on experience with state management and app deployment workflows.
-

PROJECTS

AssetVault App

Flutter | Dart | REST APIs | QR Code Scanning

- Built a mobile Asset Management System with QR scanning for asset tracking, transfers, and maintenance.
- Implemented physical audit workflows, role-based access, digital signatures, and secure authentication.

File Tracking System App

Flutter | Dart | REST APIs | QR Code Scanning

- Developed a mobile app to digitally track and manage physical files using QR codes.
- Integrated workflows for issue, transfer, return, and real-time status verification with backend synchronization.

MoneTrax App

Flutter | Dart | REST APIs | Dio

- Designed a personal finance app for expense tracking, savings goals, and predictive analytics.
 - Implemented transaction tracking, category management, budget guardrails, and secure authentication.
-
